MACC1 upregulation promotes gastric cancer tumor cell metastasis and predicts a poor prognosis

Key words: Gastric cancer, MACC1, Prognosis, Metastasis

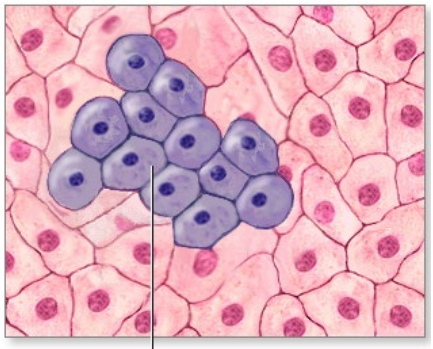

Research Summary

This review mainly focused on the roles of MACC-1 on gastric cancer, and summarized the key roles they played in the following aspects:

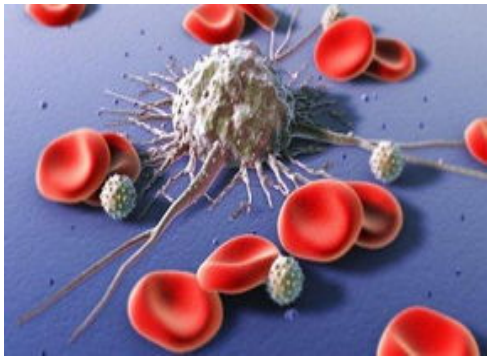

- **MACC1 expression in GC samples**
- **GC patient prognosis with MACC1**
- **MACC1 signaling pathway**

Proliferation of cancer cells

ZUS-B

Innovation points

- **Introduction** **MACC-1 roles in GC patient especially with metastasis**

- **Summary** **of the most updated research progress about MACC-1 in cancer development.**

- **Emphasis** **of the correlation of poor prognosis with high MACC-1 expression.**

JZUS-B

Figure 4

Innovation points

A comprehensive table was generated to summarize the prognosis about GC proteins.

Table 1 Clinical characteristics of GC patients associated with MACC1 expression during follow up study.
