The original version of this article unfortunately contained a mistake.

In p.750, the sentence “Therefore, it is hard to recommend operation stated, and two-phase states of MRs are necessary for component separation, which might limit the use of gas expanders and N₂-CH₄ mixtures” should be “Therefore, it is hard to recommend operation parameters and comparable SPC ranges. As already stated, two-phase states of MRs are necessary for component separation, which might limit the use of gas expanders and N₂-CH₄ mixtures.”
